

Effective March 2018

*The Pet Hotel will require your dog to be fully vaccinated for both strains of Canine influenza H3N8 & H3N2 prior to checking in to the Pet Hotel. If you do **not** have proof your dog has had the series of the 2 vaccinations for Canine Influenza your dog will **not** be allowed to check into the Pet Hotel.*

If you have a reservation or plan on having your dog(s) stay with us in the next few months you should contact your veterinarian to schedule an appointment right away as some vets run out of the vaccine or you can go to V.I.P or any other vet clinic in your area. The vaccination is a 2 part series.

We have been in contact with U.C. Davis Veterinarians regarding the outbreak and they feel this is the best way to keep it from spreading.

We have **not** had a case of Canine Influenza here at the Pet Hotel but we are taking all the necessary precautions:

- No group play time (we have never done group play)
- No sharing of water bowls
- No sharing of dog toys
- Only dogs from the same family may stay together.

We use Shaklee Basic G to clean and we have all the rooms well ventilated and staff has been instructed to sanitize their hands which has always been a policy here at the Pet hotel.

Thank you for your understanding we want only what is best for our guest. If you have any questions call (925) 930-9767 or email the pet hotel welovepetstoo@gmail.com.

Thank you,
Mindy
